# TIMELESS LUXURY OF CUSTOM DESIGN

BRUNI is a bespoke furniture manufacturer that creates custom pieces for individual clients, interior designers and hospitality.

Nature designs amazing works- it's the greatest inspiration.

We try to emphasize what nature has created. Grains are like fingerprints, so we will not find two identical copies.

BRUNI creates unique products made with attention to every detail.

# SMOKED OAK

It is oak wood that has undergone a special modification process. During this process, the tannins in the wood react with ammonia and change its color throughout the thickness of the wood. The modification allows for unusual colors, reminiscent of the colors of exotic wood.

PLOJG

# BOG OAK

Before oak becomes "Polish ebony" it must lie in the ground or under water for at least several hundred years.

Under these conditions, the tannins contained in oak, in reaction with iron salts present in water or soil, dye the wood in a characteristic black color and cause 6 to 17 percent of its structure is made of a fossil.

An exclusive material that has been appreciated by connoisseurs for ages.

# POPLAR BURL

A rare material that is distinguished by an exceptionally decorative pattern of grains, spots and spiral patterns. An unusual pattern referring to the Art Deco style.

## GIRO COLLECTION

The GIRO collection is a fusion of two materials: molded steel with pleasant curves and ceramic. The minimalist and impressive design emphasizes the geometric character of the collection.
